

FRAMELESS GLASS SHOWER

HARDWARE

 **JURALCO**
GLASS HARDWARE

Turn your dream shower into a reality.

www.juralco.co.nz

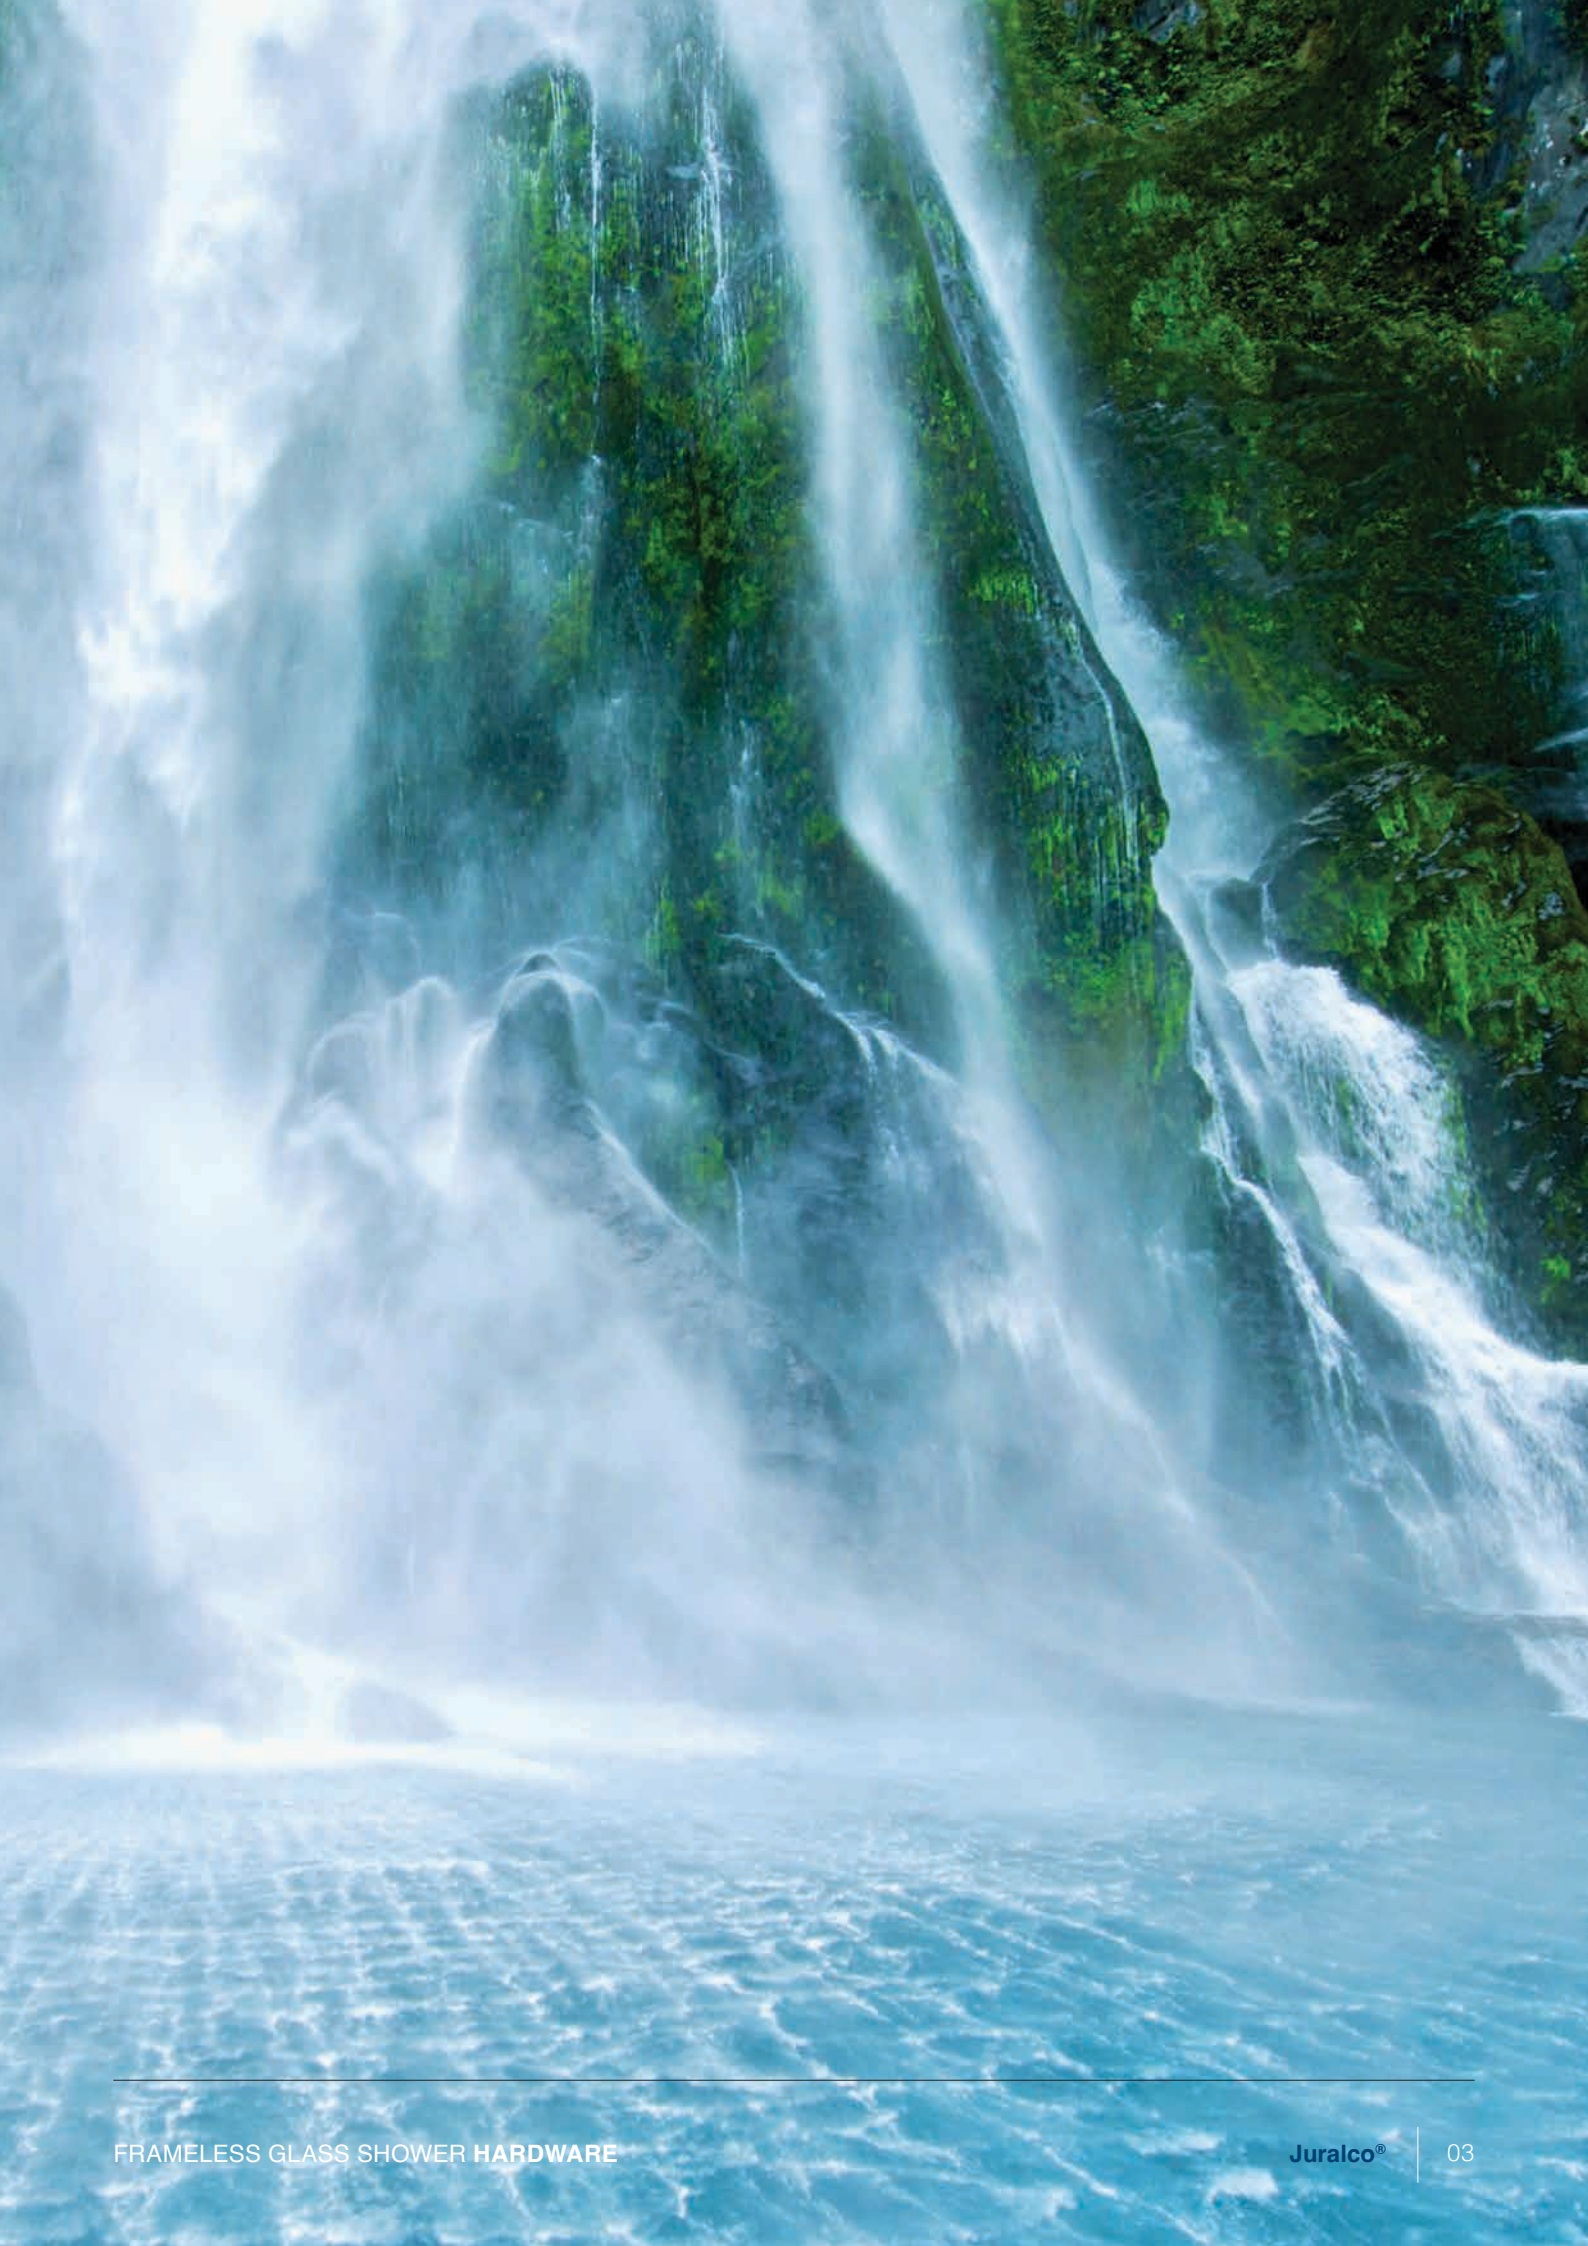

Juralco® has been providing shower inspiration for many decades and is passionate about the design, manufacture, and installation of frameless glass hardware.

100% NZ-owned and operated Juralco® exemplifies quality, care, and service across its nationwide network of Installers.

Shower Hardware refers to all the various components and mechanisms used to support, secure, and enable the functionality of a glass shower structure. As well as being safe and practical for their intended use, they should also be aesthetically pleasing to enhance your bathroom area.

The Juralco® Frameless Shower Hardware range offers a selection of premium quality products for Hinged, Sliding and Fixed shower screens. Ensure cohesive integration with existing fittings like shower heads and tapware, or upgrade a shower using the highest quality handles, hinges, and channels available, across a variety of colour options.

FRAMELESS HINGED AND SLIDING SHOWER OPTIONS

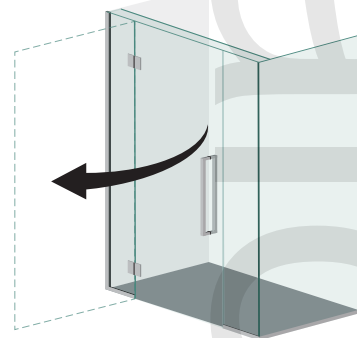

A hinged shower door describes a glass panel that opens by swinging on pivoting hinges, like a standard door in the home. The hinge can typically be attached to a stationary glass panel or the wall or shower surround. Ideal for areas where there is no restriction on door size.

A sliding shower screen door is a modern alternative to a hinged screen. Moving laterally from one side of the door frame to the other they are ideal for an area where there may not be enough room for a door to swing into the bathroom and are a great way to utilise space in a bathroom.

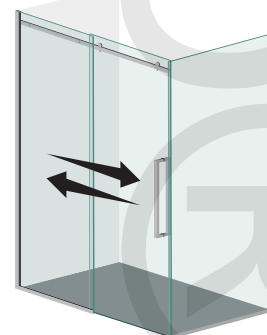

Our Frameless Glass Showers are made from clear 10mm Toughened Safety Glass, your Juralco Installer can advise on the other options available.

POPULAR CONFIGURATIONS*

Hinged Door and
